

# Appendix 2. Food Safety Plan Worksheets

---

Worksheets are recommended to document the product description, hazard analysis and preventive controls. The hazard analysis form should contain information to justify the identification of the hazards requiring preventive controls and the types of preventive controls applied. Information in the Food Safety Plan must explain the details for each preventive control.

**There is no standardized or mandated format** for these worksheets, but the information should be arranged in a progressive manner that clearly explains the thought process for the hazard analysis and the individual steps in the Food Safety Plan. Forms used for process preventive controls may be adapted for allergen preventive controls, but other formats are entirely acceptable if it works for your organization and contains all of the required information.

The following worksheets are provided as examples. The information is arranged in a similar manner, but the layouts are in either a landscape or a portrait form to suit individual preferences. Other forms can be adapted from those in the Food Safety Plan example.

**Special Note:** These worksheets can be copied for routine use, but if they are used for official use, they must include details that identify the commercial firm and related information. The additional information must include:

- Firm name and location
- Dates and, when appropriate, the time of the activity
- Product identification
- Usually, record review signature (or initial) and date

All forms can be adapted or modified as needed. There is NO required form.

<b>Verification</b>				
<b>Records</b>				

# Form Name: Food Allergen Preventive Controls

PLANT NAME	ISSUE DATE	PAGE
ADDRESS	SUPERSEDES	PRODUCT CODE

Allergen Control	Hazard(s)	Criterion	Monitoring				Corrective Action	Verification	Records						
			What	How	Frequency	Who									

<b>PLANT NAME</b>	<b>ISSUE DATE</b>	<b>PAGE</b>
<b>ADDRESS</b>	<b>SUPERSEDES</b>	<b>PRODUCT CODE</b>

## Form Name: Food Allergen Ingredient Analysis

Raw Material Name	Supplier	Food Allergens in Ingredient Formulation								Allergens in Precautionary Labeling
		Egg	Milk	Soy	Wheat	Tree Nut <small>(see label source)</small>	Peanut	Fish <small>(see label source)</small>	Shellfish <small>(see label source)</small>	

**NOTE:**  
The above format is an alternative for an allergen specific hazard analysis. If you choose to use a form like this, then there is no need to duplicate allergen considerations in your hazard analysis chart. Duplication of information in multiple forms can create extra work and may lead to inconsistencies.

Some organizations may even choose to do an ingredient hazard analysis that considers not only allergens, but also other hazards. This may be a useful option for you.

**How to Use the Chart**  
List all ingredients received in the facility. Identify allergens contained in each ingredient by reviewing ingredient labels or contacting the manufacturer. Any allergens listed in "May contain" or other precautionary labeling on ingredients should be listed in the last column and reviewed to determine if allergen labeling is needed on the finished product.

<b>ADDRESS</b>	<b>SUPERSEDES</b>	<b>PRODUCT CODE</b>

## Form Name: Food Allergen Label Verification Listing

<b>Product</b>	<b>Allergen Statement</b>

<b>PLANT NAME</b>	<b>ISSUE DATE</b>	<b>PAGE</b>
<b>ADDRESS</b>	<b>SUPERSEDES</b>	<b>PRODUCT CODE</b>

## Form Name: Production Line Food Allergen Assessment

Product Name	Production Line	Intentional Allergens							
		Egg	Milk	Soy	Wheat	Tree Nut (market name)	Peanut	Fish (market name)	Shellfish

**Scheduling Implications:**

**Allergen Cleaning Implications: (Required)**

### How to Use This Form

Complete for each production line. Identify each allergen contained in each product produced on the line. Identify any allergens unique to a specific product, then indicate scheduling information (i.e., run unique allergens last) and allergen cleaning information (i.e., full allergen clean before running cheese or plain omelets after a biscuit run).
